Saw you leanin' against,
That record machine,
Saw the name of your band,
Written on the marquee,
It's a full moon tonight,
So we gettin' rowdy,
Yeah, we gettin' rowdy,
G-g-gettin' rowdy,
Feelin' like I'm a highschooler,
Sippin' on a warm wine

Although rough at the edges and buggy (after all this is an early-access), handled right it can become a fantastic game.. My first review:

Terrible profile system. I have to reset password every time I want to log into my profile. Neither profile password nor even login name is remembered by the game.

Update in a month or so:

Tech support solved the problem with my account, so now it's all thumbs up! I love the box version, I love the PC version all the same. Usually I play quickgames with PC, difficulty levels are ok, though they could contemplate the next move a bith quicker.. This game is quirky and REALLY HARD!!!! If that's what you're looking for, than that's what you've found! :P

Story: 7/10

Music: 10/10 (I can see why they have that as DLC)

Gameplay: 8/10 (This is assuming you're into difficult games)

Art: 5/10 (It's nothing to write home about, but it definitely feels quirky and the cool comic cutscenes are worth the struggle)

For \$8 you're getting your money's worth, there's nothing like the feeling of beating one of these levels haha and I think that's the point.

I'm planning on beating the whole thing, wish me luck :P. It's just so grindy after the first few levels, it seems that not much changes.. It's a joke.

How am I supposed to beat "Mahjong Huntress" or even progress when I'm stuck?

I'm stuck at level 8 and have replayed it more than a dozen times but can't beat it. The stones always lie so badly that sooner or later the possible pairs are gone and it's "Game Over". Also I'm out of power ups (or power up juice) because I had to use them before to get that far.

And don't get me wrong: I'm not a beginner in Mahjong: I've played it a lot, it's one of my favourite puzzle games and time wasters. So I notice which pairs are good to remove at one moment and which ones aren't.

And it's not even like I can buy powerups or other helpful elements (micro transactions) to get further. Not that I miss that but I'm very surprised, though...

So: No, look for other Mahjong titles. This one is pretty much broken, designed badly and not fun.

Last but not least: The story. Yes, there's a story around all the levels about a young British lady (you) trying to solve a mystery of her disappeared fiancé. She doesn't love this future husband but must find him or else she and her family get suspected and have to live in shame. Now if that's not motivating enough to get through this broken game, I don't know...

My guess is that her fiancé got stuck pub getting wasted just like how I got stuck in the game. I don't care anymore.. Motion sickness: The Game. Great DCL, but they released very late. Many people didn't know about it.

You know that kind of game that ages well? This is not that kind of game.. It's a standard HOG. It's not that bad but I wouldn't buy it at full price. Pick it up on sale.
